DETAILED ACTION

Prelim. Amdt/Amendment

1. Receipt is acknowledged of the Amendment filed 17 November 2004.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-9 and 14-19 are rejected under 35 U.S.C. 102(b) as being anticipated by Schultz et al (US 5,280,159).

Re claims 1-9 and 14-19: Schultz et al discloses an RF tag reader 10, which serves as a RFID extension for a mobile computer 30 lacking RFID functionality, comprising a battery 15 (fig. 5; col. 2, lines 64+); circuitry coupled to the battery 15 for providing the RFID functionality (col. 2, line 68 through col. 3, line 13); a first modular attachment interface 24 selectively coupling to a second modular attachment interface 24 of the mobile computer 30 to the circuitry/reader 10 such that the mobile computer 30 has access to the RFID functionality provided by the circuitry/reader 10 when the mobile computer 30 is coupled to the modular attachment interface 24 (fig. 10; col. 3, lines 14-48 and col. 4, lines 3-16); a barcode scanner 40 coupled to the second modular attachment interface 44 such that the mobile computer 30 has access to data encoded

in a barcode symbol scanned by the barcode scanner 40 when the mobile computer 30 is coupled to the modular interface 44 (fig. 10; col. 3, lines 14-48 and col. 4, lines 3-16); wherein the circuitry for providing the RFID functionality further comprises an electromagnetic transceiver (col. 3, lines 1-14 and lines 35-40); wherein the circuitry for providing the RFID functionality further comprises a RFID tag air interface decoder (i.e., encoded data from transponder 21 received by an antenna 18 via an air interface) (col. 3, line 42-48); a wired network; an access point for transmitting transmission data from the wired network to the mobile computer 30 via a wireless medium and receiving reception data from the mobile computer 30 to the wired network via the wireless medium and also for forming a transmission area that includes space where association to the access point is possible by the mobile computer 30 (i.e., the received data can be stored at the mobile computer 30, processed and transmitted wirelessly via antenna 33 to any desired access points) (col. 3, lines 45-48).

Response to Arguments

4. Applicant's arguments with respect to claims 1, 5 and 14 have been considered but are moot in view of the new ground(s) of rejection.

Newly cited reference to Schultz et al has been used in the new ground rejection to further meet the newly added limitation of the claimed invention 1, 5 and 14 (i.e., "a modular attachment interface for selectively coupling the mobile computer to said circuitry such that the mobile computer has access to the RFID functionality provided by the circuitry when the mobile computer is coupled to said modular attachment interface"

and "second modular attachment interface for selectively coupling to said first modular attachment interface such that the mobile computer has access to the RF functionality provided by said circuitry when said second modular attachment interface is coupled to said first modular attachment interface").

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The patent to McAllister et al (US 6517000 B1) is cited as of interest and illustration a similar structure to a range extension for RFID handheld mobile computers.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
